SOFT SKILLS

+ Communication and Leadership

+ Strong presenter

+ Strong analytical and critical thinking skills

+ Ability to work independently and collaboratively in a fast-paced, deadline-driven environment

EDUCATION

BSc. Botany (2016-2023)

Obafemi Awolowo University,

Ile-Ife, Osun State. Nigeria

CERTIFICATIONS

+ Certificate of Course Completion, Data Science (Aptech Computer Education)

+ Certificate of Course Completion. Data Science: Python for Data Analysis (Udemy)

+ Certificate of Course Completion, Introduction to Data Science (Cisco Networking Academy)

+ Certificate of Course Completion, Data Analytics Essential (Cisco Networking Academy)

+ Certificate of Completion, Become a Data Analyst (LinkedIn Learning)

+ Certificate of Completion, Power BI Essential Training (LinkedIn Learning)

+ Advanced Excel formulas and functions (CFI)

EXPERIENCE

SGL TECHNOLOGIES, IKEJA, LAGOS STATE, NIGERIA (Sept 2023 – till date)

Course Facilitator

• Designed and implemented a 10-week Python course covering data structures, algorithms, and automation for a cohort of 11 learners.

• Guided students through Tableau's interface and functionalities to create visualizations and dashboards for data analysis.

• Instructed learners in SQL fundamentals, including data retrieval, manipulation, and query optimization.

• Effectively addressed student inquiries and resolved technical challenges during course sessions.

• Provided constructive feedback on student assignments and projects to promote skill development.

• Fostered a collaborative learning environment through group discussions and peer-to-peer learning activities.

FREELANCER (Jan 2023- till date)

Data Analyst

• Delivered tailored data solutions for clients across various industries, leveraging expertise in Excel, Python, Tableau, and SQL.

• Wrangled, cleaned, and analyzed data from diverse sources to uncover actionable insights and drive informed decision-making.

• Automated repetitive tasks with Python scripts to improve efficiency and productivity.

• Crafted compelling data visualizations in Tableau to communicate complex information clearly and concisely.

• Developed and implement custom dashboards and reports for data monitoring and performance tracking.

• Collaborated effectively with clients to understand their needs and deliver projects on time and within budget.

APTECH COMPUTER EDUCATION, ALLEN AVENUE IKEJA, LAGOS STATE, NIGERIA. (July 2022 – Jan 2023)

Student Work Experience

• Gained comprehensive theoretical and practical knowledge in data analysis principles and techniques.

• Mastered data manipulation and analysis skills using Python libraries like NumPy, Pandas, and Matplotlib.

• Developed proficiency in creating interactive data visualizations and dashboards with Tableau.

• Acquired practical skills in writing and executing SQL queries to retrieve and manipulate data from relational databases.

• Completed data analysis projects with real-world datasets, applying learned skills to solve problems and generate insights.

• Collaborate with cross-functional teams to define data needs, and develop data collection and analysis strategies.

• Participated in workshops and presentations, actively learning from industry experts and guest speakers.
